

THE UNIVERSITY: DISSEMINATION AND SCIENTIFIC PUBLICATION

LA UNIVERSIDAD: DIFUSIÓN Y PUBLICACIÓN CIENTÍFICA

Elio Iván Rodríguez-Chávez^{1,a}

Ricardo Palma University, as a leading institution of higher education, is strongly committed to promoting scientific dissemination and the publication of quality scientific journals. In the era of knowledge, and instant knowledge, having scientific journals indexed and available online brings enormous benefits, both for the university community and for the scientific community in general.

The Journal of the Faculty of Human Medicine of the Ricardo Palma University presents some important particularities to point out:

- It is a magazine that publishes topics of Medicine and Public Health.
- It belongs to the Open Access Journals, which is suitable for the reality of Latin America and makes the latest knowledge and the results of original research works freely available to everyone.
- It is a university journal, related to medical sciences, one of the areas of greatest production at the international level.
- It publishes quality works of diverse national and international authors.
- Reached and complied with several national and international standards.

Therefore, in the context of the 50th anniversary of the Ricardo Palma University, we congratulate all the editorial team of the Journal of the Faculty of Human Medicine, led by Dr. Jhony A. De La Cruz Vargas, for the various indexes reached, the most recent in Scielo and LILACS.

Many challenges remain in the future; sustaining oneself and aspiring to new indexations are the next challenges. Ricardo Palma University congratulates itself on these achievements, which are inherent to the vision and mission of our University.
