

UNIVERSIDAD RICARDO PALMA THE “DOCTOR HONORIS CAUSA” DISTINCTION TO PROF. DR. HERBERT MICHAEL (BOB) PINEDO

LA UNIVERSIDAD RICARDO PALMA OTORGA LA DISTINCIÓN “DOCTOR HONORIS CAUSA” AL PROF. DR. HERBERT MICHAEL (BOB) PINEDO.

Jhony A. De La Cruz-Vargas ¹, Félix Romero Revilla ²

The Doctor Honoris Causa is the highest honorary title awarded by the Universidad Ricardo Palma to eminent individuals. This distinction is conferred with great care and rigor to outstanding national and international personalities who, through their work and personal trajectory, honor culture, science, and humanity.

Based on the remarkable academic trajectory of **Dr. Bob Pinedo**, his invaluable scientific contributions, and, notably, his distinguished spirit of collaboration with Peru, Latin America and the Caribbean, and notably with our university, a ceremony was held in which **Universidad Ricardo Palma** awarded him the academic distinction of **Doctor Honoris Causa** during the 2024 International Congress on Cancer and Public Health. Additionally, during the same ceremony, he received recognition and an award from the Colegio Médico del Perú.

Dr. Bob Pinedo, born in Curaçao, pursued his medical studies in Amsterdam, and his brilliance, creativity, and relentless work ethic led him to hold various positions and responsibilities in the scientific world. A pioneer of Medical Oncology in Europe, he imparted knowledge through the European School of Oncology (ESO), led numerous research projects and academic organizations, and mentored many young oncologists from various countries, including physicians from Latin America. Dr. Pinedo served as President of the European Society for Medical Oncology (ESMO) and became the third European to receive the prestigious ASCO (American Society of Clinical Oncology) award: David A. Karnofsky Memorial Lecture in 2014 (<https://society.asco.org/people/h-m-pinedo-md-phd>). He has won numerous international awards, promoted and driven research, published over 600 scientific articles in prestigious indexed journals, and authored multiple books and book chapters. He is a globally recognized authority in the medical, scientific, and oncological fields.

The Rector of the Universidad Ricardo Palma highlighted numerous reasons for granting this distinguished recognition as Doctor Honoris Causa:

His intense and enriching scientific contributions

His academic renown and outstanding academic career

His valued and esteemed daily dedication as a specialist oncologist, earning the respect and admiration of colleagues, friends, and patients

¹ General Director of the Instituto de Investigaciones en Ciencias Biomédicas, Universidad Ricardo Palma.

² Rector of the Universidad Ricardo Palma.

4. His prestige as a Scientific Researcher
5. His dedication and vocation as a Professor and Mentor to many generations of physicians, residents, interns, and doctoral students from his department and research laboratory in Amsterdam.
6. His admirable humanity, principles, values, and his interest in helping even distant countries, such as those in Latin America

His research enjoys extraordinary recognition worldwide, with numerous books published in various countries and languages, hundreds of articles in the most impactful and prestigious journals, and countless contributions to national and international congresses.

With a lifetime devoted to teaching, research, and clinical activities, Dr. Bob Pinedo leads advanced and innovative research to assist patients in diagnosis, prognosis, and treatment. His cutting-edge research focuses on Precision Medicine, Molecular Medicine, and Genomics. He leads research protocols and clinical trials for cancer patients, seamlessly integrating clinical care with advanced research settings. Dr. Pinedo worked for over 25 years as the head of the Oncology Department in Amsterdam. He holds visiting professor positions at Johns Hopkins University and the University of Twente (Netherlands).

Over a career spanning four decades, Dr. Pinedo has concentrated on original and translational cancer research, combining cutting-edge basic science with clinical excellence. As a clinical investigator introducing new concepts to early clinical trials, he has made groundbreaking observations in cancer biology and

mechanisms related to drug action and resistance in patients. He has shared his knowledge across the world, delivering courses and lectures and participating in numerous cancer control missions in Europe, the U.S., and globally. At every moment, he has demonstrated his selfless dedication, kindness, friendship, and unwavering support to anyone in need.

To be truly great, one must stand with the people, not above them, and Dr. Bob Pinedo has always stood—and we are sure will continue to stand—with all those who need him...

At the Universidad Ricardo Palma and the Instituto de Investigaciones en Ciencias Biomédicas, we share the dream that together, we can continue changing the world. If life permits, we are ready to keep joining efforts and collaborations to help many more people.

During the ceremony, the authorities emphasized: We honor and distinguish a man who represents many physicians, oncologists, and researchers. Through his effort, discipline, talent, intelligence, values, principles, and spirit of helping others, he has dedicated his life as a doctor, teacher, researcher, Mentor, Father, Husband, and for many fortunate people like us, a Friend.

Thank you, Bob... Keep helping people every day and contributing to improving the health and quality of life of our communities.
